

**Decisions taken in the meeting with RG&CCI on 10.12.25 and 11.12.25 regarding
feedback of Phase-I (HLO) Pre-test received from DCOs**

CMMS portal

1. IT Division shall coordinate with the Internet Service Providers (ISP) to ensure the smooth functioning of Census apps prior to the commencement of the actual HLO Phase. This will help avoid any operational disruptions for enumerators and supervisors during fieldwork.
2. Name of the Charge Officer shall be clearly mentioned in the Appointment Letter of E&S.
3. End time of training shall not be provided in Appointment Order of the E&S
4. A standard data format shall be uniformly followed across the portal to avoid inconsistencies between bulk upload and single-entry modules on the CMMS portal.
5. One enumerator will be allotted HLBs under 1 supervisor only. It may be explored if software may be designed in such a way without much difficulty that one enumerator may be allotted to more than one supervisor under exceptional circumstances.
6. The maximum permissible size of a training batch shall be restricted to 50 trainees for E&S. In cases where the number of trainees exceeds 50, two separate batches shall be formed.
7. It shall be clearly stated in the Instruction manual or Circular that Charge Officers must be sensitized to ensure that while carving HLBs on the HLBC Web Map application, the resulting HLBs do not cut across Revenue Village mandatorily and preferably also Panchayat boundaries.
8. The drop-down menu under Remarks Column of Village Register shall be revised to include the following:

Forest Village

Reserve Forest

Uninhabited

Submerged

Census Town

Others

In case Others is selected, an editable text field should be enabled to allow the user to enter specific remarks. There should be provision to leave as blank also.

9. Census Division to review and finalise format for VR/TR and CR.
10. It has been decided as per discussion in the DCO Conference and internal discussion that whenever there is no change in jurisdiction of wards, 2011 ward population may be taken for comparison purpose, as mentioned in Business Requirement Document and in the format for information collection from Charge Offices based on JC Portal.
11. It has been decided as per discussion in the DCO Conference that the name of districts and sub-districts may be kept as it is in town and urban charge register. Whenever there is multiple sub-district/district in a town, this field will be kept blank.
12. No of reports to be made available in CMMS to be finalised. Only necessary reports which are independent in nature to be provisioned.
13. Progress reports to be available in real time.
14. Email issues to be taken up with NIC urgently.
15. Separate framework to be provided for Practice and Training.
16. The default value for number of days training attended by E&S should be 3. The CO may update as per actual attendance. In the Attendance update part of Training Module one certification from Charge Officer is required to the effect that "I certify that all E&S have attended training as shown above".
17. "Deactivated" should be used for users instead of "Inactive".
18. The roles of E&S will not be available for reversal after user creation.
19. Testing Plan with guidelines for testing of all Digital Tools to be prepared and shared with DCOs asap.

HLO App

1. PDF of the HLB made by Charge Officer in HLBC to be pushed to the HLO app of Enumerators and Supervisors for reference.
2. Expected number of Census Houses and households will be entered in the HLO App by enumerators after identifying the block and drawing layout map.
3. It shall be mentioned in FAQs that once a building number is entered in the HLO App, it cannot be edited. However, in such cases, the enumerator may delete the entire record and add a new one if any correction is required.

HLBC

1. Map and IT related activities are closely interlinked and should therefore be undertaken simultaneously to ensure proper synchronization.
2. It may be clearly stated in Circular related to HLB formation that assistance of local field functionaries are to be mandatorily taken while carving of HLBs in HLBC.
3. Multiple sessions from the Charge Admin account should be permitted to facilitate the completion of HLB carving process. There is no requirement to create additional sub-charge roles for this purpose.
4. HLB Type, Supervisory Circle creation and Description of HLB to be done in CMMS only taking geo-referenced HLBs carved out in HLBC as reference. These particulars will be visible in HLBC also.
5. Printed HLB map will be attached as a part of the Appointment letter and also pushed to the enumerators and supervisors HLO app in PDF format. The concerned enumerator will refer the same and prepare the outline and mark buildings & number of Census Houses on the blank layout map (to be provided by DCOs) as per usual procedure.
6. All avenues for getting best quality geo-referenced base map for HLBC and SE to be explored. Meetings to be done with different map providers at the earliest.

Self-Enumeration (SE)

1. It was finalized that capturing location of the SE respondent is to be done on the SE portal itself. To ensure accuracy, the integrated map API must be robust and optimally configured.
2. It was also decided to drop DIGIPIN feature due to its unstable database. Instead, the latitude and longitude of the location marked by the SE respondent will be recorded.
3. Language selection for SE will be prompted and allowed only Once.
4. Selection of State and District shall be made mandatory for SE respondents when searching for their location.
5. SE progress status at State, District level to be available to DCO State and District Logins.
6. Editing of information submitted through Self-Enumeration shall be restricted to a total of three attempts – once before first submission and two subsequent edits.

7. A 100-meter buffer distance shall be maintained for capturing the SE ID in both rural and urban areas.
8. Session Management to be properly maintained, with automatic logout set to occur 15 minutes after the last edit.
9. Re-login for SE will be validated through the registered mobile number only.

Others

1. In addition to other ways, all feedback should be incorporated in CFMS.
2. Error codes and Validations of All digital tools to be provided through FAQs
3. Identity Card Holder (Transparent) lanyard (with Census logo) to be provided with the Identity Cards.
4. Preparation of presentation at higher level on data security aspects.
5. In the Instruction Manual last 20 pages may be kept blank for writing notes during training.
