	Scoping Sheet for Web Application/Website/Web Services Security Testing	
S. No.	**Parameters**	**Description**
1	**Web Application Name & URL**	Licensing of Certifying Authorities and Dashboard for DSCs
2	**Developer Contact Details**	Gaurav Singh, +91-8447260570
3	**Application will be hosted on (State Data Center, NIC, Private server, AWS Cloud etc.)**	NIC , https://ccalms.cca.gov.in , 45.127.74.108
4	**Application Server with Version (i.e. IIS, Apache, Tomcat, etc.)**	Backend: Apache Tomcat 10.x (embedded via Spring Boot 3.3.1) for each microservice. API Gateway: Spring Cloud Gateway (port 80/7778). Frontend: Nginx Web Server
5	**Front-end Tool [Server side Scripts] (ASP, Asp.NET, JSP, PHP, etc.)**	React.js 18.3 (Single Page Application - client-side JavaScript). UI Framework: Material UI (MUI) v6.
6	**Back-end Database (MS-SQL Server, PostgreSQL, Oracle, etc.)**	PostgreSQL v16 Database Name: cca_db Host: 10.212.168.173:5432 ORM: Spring Data JPA / Hibernate
7	**Operating System Details (E.g. Windows, Linux, AIX, Solaris, etc.)**	Linux OS
8	**Whether the application contains any content management system (CMS) like Drupal, Joomla, wordpress etc. (If yes then which?)**	No.
9	**Authorization No. of roles & types of privileges for the different roles**	Approximately 9 primary roles with Role-Based Access Control (RBAC) and menu-level privileges: 1. ROLE_ADMIN 2. ROLE_APPLICANT 3. ROLE_LICENSEE 4. ROLE_EXLICENSEE 5. ROLE_AUDIT_AGENCY 6. ROLE_CCA 7. ROLE_CCA_OFFICER 8. ROLE_APPLICATION_REVIEW_COMMITTEE Authentication: JWT (Bearer token) with OTP-based two-factor authentication. Authorization: Route-level and action-level access control based on assigned role and menu permissions.
10	**Total No. (Approximate) of Input Forms**	Approximately 120-175 input forms Includes: license application forms (Individual/Firm/Government), renewal forms, audit forms, Annexure A2 forms, admin master data forms, ESP application forms, cessation forms, payment forms, and dashboard forms.
11	**Total No. of input fields**	Approximately 786+ input fields
12	**No. of login modules**	5 login/authentication modules: 1. Main User Login - Username/Password + CAPTCHA + OTP verification 2. Intent Registration - New applicant self-registration with OTP 3. Forgot Password - OTP-based password reset 4. eSign Authentication - Digital signature (eSign) integration module 5. Change Password - Post-login password change for authenticated users Additional: Multi-role selection for users with multiple assigned roles.
13	**Is there any paymeny gateway ?**	No integrated online payment gateway (Razorpay, PayU, BillDesk, etc.). Payment is handled via offline mode only: Bank Draft details submission (bank name, draft number, amount, issue date) followed by payment proof document upload and manual verification by CCA Officer.
14	**Whether audit to be conducted remotely? Yes or NO**	Yes
15	**Whether application has been tested earlier. If yes, in which year last testing was carried out**	Yes, 2025
16	**Is application behind any WAF (Web application Firewall)?**	No

17	**Number of Web Services, if any**	12 REST API microservices (excluding API Gateway): 1. auth-service 2. admin-service 3. newlicense-service 4. renewal-service 5. license-issuance-service 6. audit-service 7. annual-audit-service 8. cessation-service 9. notification-service 10. esign-service 11. esign-application-service 12. dashboard-service Plus: API Gateway (Spring Cloud Gateway) as single entry point.
18	**Number of methods in all web services**	Approximately 654 REST API endpoint methods across all microservices.
19	**Number of Input Fields in methods of web services**	Approximately 813 input parameters across all REST API methods
20	**Number of static pages**	151
21	**Number of dynamic pages**	88
